

Guardian Angels...

They are with you from birth (and sometimes even from conception) and often they have guided you through many lifetimes.

Your guardian angel may have lived many lifetimes of their own and then decided to help and guide you in order to progress spiritually. Others have only ever been a guardian angel.

Some will appear very gentle and angelic in nature; whereas others have a much stronger energy. You may find they have certain characteristics such as a good sense of humour.

They are with you to comfort you, to guide you and help you through the maze of life; so that you may find your way to achieving what you came to the earth to do.

Often guardian angels will have a name that they like to be known as. Sometimes they are just happy for you to give them a name yourself that you feel comfortable with.

Guardian angels are not permitted to intervene with your life without permission, unless it is a life threatening situation and it is not your time to leave the earth. They may give you little signs to point you in the right direction still though. Perhaps seeing or hearing the same thing many times in a short space of time for example.

Although they are with you to guide you and will happily give you signs; they can help you much more once you give your permission and actually ask for their help. They are able to clear your pathway and make things much easier for you providing it is for your highest good and will not interfere with important soul lessons.

If you needed any further encouragement to work with your guardian angel you may be interested to know that by helping you on your journey it allows them to progress spiritually and it actually brings them great joy to be of service to you. So many guardian angels have to sit back and feel helpless as they have not been given permission to help and all they can do is offer comfort and gentle guidance that will hopefully be noticed.
